

Assignment 2:

7179KCTKCTKCTKCTKCTKCTKCT19BEC039

7179KCTKCTKCTKCTKCTKCTKCT19BEC059

179KCTKCTKCTKCTKCTKCTKCT19BEC214

7179KCTKCTKCTKCTKCTKCTKCT19BEC218

1. Create User table with user with email,usernameand password.

The screenshot shows the IBM Db2 on Cloud console interface. The 'Tables' tab is selected, displaying a list of tables: 'JOBS' and 'USERS'. The 'USERS' table is highlighted. The 'Table definition' panel on the right shows the schema for the 'USERS' table, which has three columns: 'USERNAME' (VARCHAR, 32, nullable), 'EMAIL' (VARCHAR, 32, nullable), and 'PASSWORD' (VARCHAR, 32, nullable). The table is located in the 'YGG09863' schema. A 'View data' button is visible at the bottom of the table definition panel.

Name	Data type	Nullable	Length	Scale
USERNAME	VARCHAR	Y	32	0
EMAIL	VARCHAR	Y	32	0
PASSWORD	VARCHAR	Y	32	0

2. Perform UPDATE,DELETE Queries with user table

The screenshot shows the IBM Db2 on Cloud console interface with the 'SQL' tab selected. The 'Data objects' panel on the left shows the 'YGG09863' schema. The 'My script' panel on the right contains the following SQL queries:

```
1 insert into users values('maryada','sample123','maryada@student.tce.edu');
```

The 'History' panel at the bottom shows the execution history of the queries. The first query was executed successfully on Oct 3, 2022 at 10:22:41 AM, with a runtime of 0.024 s. The second query was executed successfully on Oct 3, 2022 at 10:21:51 AM, with a runtime of 0.039 s.

Script	Date	Status	Runtime
Untitled - 1	Oct 3, 2022 10:22:41 AM	✓ 1	0.024 s
insert into users values('maryada','sample123','maryada@student...		✓	0.024 s
Untitled - 1	Oct 3, 2022 10:21:51 AM	✓ 1	0.039 s
delete from users where username='maryada'		✓	0.039 s

3. Connect python code to db2. (Done in question 4)

4. Create a flask app with registration page, login page and welcome page. By default load the registration page once the user enters all the fields store the data in database and navigate to login page authenticate user username and password. If the user is valid show the welcome page

app.py:

```
#!/usr/bin/env python3
# -*- coding: utf-8 -*-
```

```

from flask import Flask,redirect,request,render_template,url_for,session
