| Maximum Marks | 4 Marks                           |

### Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

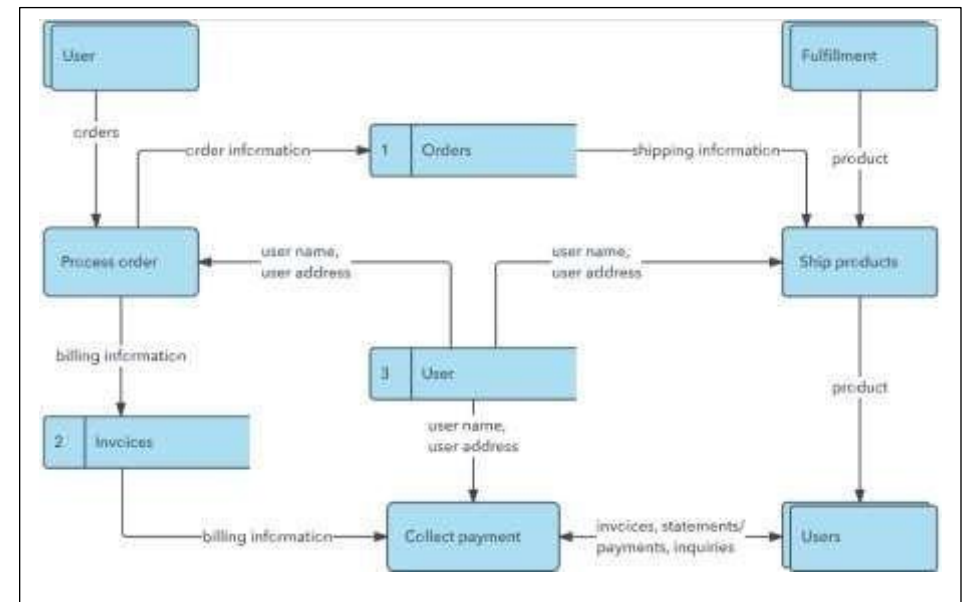

#### Example: [\(Simplified\)](#)

Flow

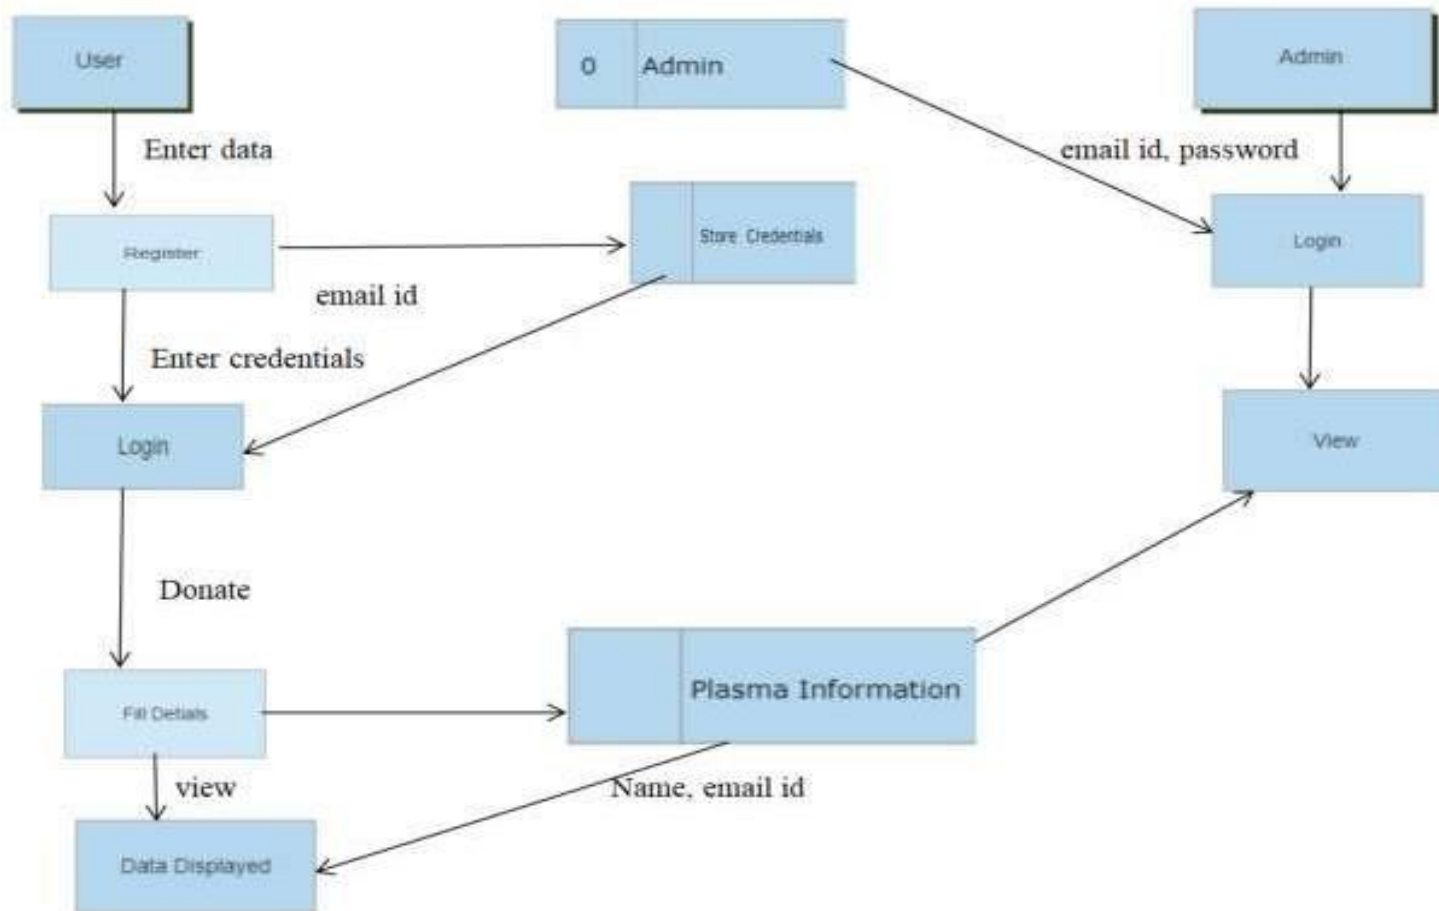

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

#### Example: DFD Level 0 (Industry Standard)

## User Stories

Use the below template to list all the user stories for the product.

| User Type               | Functional Requirement (Epic) | User Story Number | User Story / Task   | Acceptance criteria   | Priority | Release   |
|-------------------------|-------------------------------|-------------------|---|---|----------|-----------|
| Customer (Mobile user)  | Registration                  | USN-1             | As a user, I can register for the application by entering my email, password.           | I can access my account dashboard                                     | High     | Sprint-1  |
|                         |                               | USN-2             | As a user, I will receive confirmation email once I have registered for the application | I can receive successful message                                      | High     | Sprint-1  |
|                         | Login                         | USN-3             | As a user, I can log into the application by entering email & password                  | I can access into my Profile and view my dashboard                    | High     | Sprint-1  |
|                         | Dashboard                     | USN-4             | As a user, I can login using my credentials and it will direct it to my dashboard       | I can view and access what are the features are provided in dashboard | High     | Sprint-1  |
| Customer (Webuser)      |                               | USN-5             | As a user, I can login using my credentials and it will direct it to my dashboard       | I can view and access what are the features are provided in dashboard | High     | Sprint -1 |
| Customer Care Executive | Query                         | USN-6             | As a user had an any query about the given requirements                                 | I can view a query and rectify the given query                        | medium   | Sprint-2  |
| Administrator           | Login                         | USN-7             | As a admin ,have credentials using that they can login                                  | They can view and modify the data in database                         | medium   | Sprint-2  |
|                         | View                          | USN-8             | As a admin I can view plasma information  | View and modify   | High     | Sprint-1  |
|                         | Modify                        | USN-9             | As a admin I can modify the plasma information.   | Modify only if there is a false information/                          | Medium   | Sprint-1  |
